Testimonial
Georganna
Patient and Volunteer

When I was in the devastated state of finding out I had breast cancer, this group absolutely helped me during my lowest point. They are the most compassionate group of individuals I have ever come across. I definitely recommend this group to every woman, man, or parent who has a child fighting cancer to get involved in this group. They will help in every way. I wish I could give back half of what they give to each and every one they come in contact with.
